

Daily Spectra-Scorb Plus

Vitamin C

Vitamin C has been supplemented in diets ever since British sailors began carrying lemons and limes aboard ship to prevent scurvy (the origin of the nickname, Limey). Scurvy is a terrible disease resulting from vitamin C deficiency. Scurvy causes the breakdown of many different tissues. Gums become sore and bleed, teeth loosen, and joints become swollen and painful. As scurvy progresses, old scars open up into fresh wounds. The victim becomes depressed, emaciated, and finally dies. It was common for half of a ship's crew to lose their lives to scurvy on early trips from Europe to the New World. Many lives were saved due to the discovery by James Lind that vitamin C (in the form of fresh citrus fruit or concentrated juices) cured scurvy. The isolation of vitamin C by Dr. Albert Szent-Gyorgyi paved the way for modern supplementation.

Today, of course, it is not necessary to carry lemon and limes when supplementing with vitamin C. **Daily Spectra-Scorb Plus** provides high quality, concentrated vitamin C with the bioflavonoids that naturally occur with vitamin C, all in a convenient tablet form.

Why Mineral Ascorbates?

Many people complain of the acidity of typical vitamin C (ascorbic acid) supplements. With **Spectra-Scorb Plus** acidity is never a problem. Mineral ascorbates are a low-acid "ester type" mineral salt of vitamin C. Mineral ascorbates are very easily absorbed and completely safe.

In addition to vitamin C, **Spectra-Scorb Plus** supplies significant amounts of calcium, magnesium, zinc, potassium, manganese and molybdenum as ascorbate complexes. Included in this advanced blend are hesperedin, rose hips, acerola cherry, rutin, pectin, and extracts of orange, lemon, and grapefruit. **Spectra-Scorb Plus** supplies a lot of good nutrition in one tablet. Why settle for anything less than the best, anything less than **Spectra-Scorb Plus**!

Chlorophyll

An unfortunate feature of vitamin C is its extreme instability. Heat, oxygen, and light can all destroy the vitamin. **Spectra-Scorb Plus** has a special chlorophyll coating to protect it from light and oxygen. We urge our customers to avoid placing a bottle of **Spectra-Scorb Plus**, or any supplement, near a heat source or on the dash of an automobile. With **Spectra-Scorb Plus** you always receive a fully potent supplement.

Spectra-Scorb

For persons who prefer using smaller doses of vitamin C more often, we have **Spectra-Scorb** (not Plus). **Spectra-Scorb** is also a mixed mineral ascorbate with 500 mg of vitamin C per tablet and is not sustained release. **Spectra-Scorb** is available in bottles of 100 tablets.

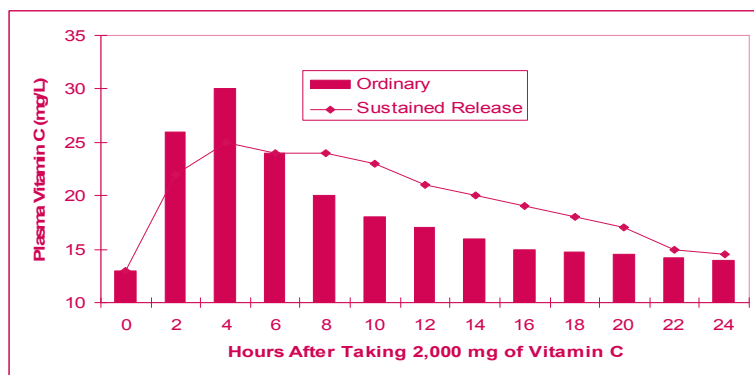

Balance your nutritional supplement program with the complete line of high quality Daily nutritional and herbal supplements.

Sustained Release Vitamin C

Vitamin C is not efficiently utilized when taken in infrequent large doses. As you can see in the chart below, when vitamin C is taken in one large dose, the plasma levels peak at four hours and then drops rapidly. It would be much better to have somewhat lower levels over a long period of time. This can be accomplished by taking vitamin C every 4-6 hours. However, most people would prefer not to worry with taking supplements that frequently. When you use **Spectra-Scorb Plus** the vitamin C is released slowly throughout the day, supplying a controlled amount of the nutrients throughout the day. The sustained release of **Spectra-Scorb Plus** guarantees that you will get the most benefit from your supplement. Even when sleeping at night you can have confidence that vitamin C is working for you. Remember that all but a very few animals, and humans, make their own vitamin C all day and all night. Humans, have a defective gene for making an enzyme that is essential for the synthesis of vitamin C in the liver. Vitamin C deficiency is a genetic disease inherited by all people. However, you can have a constant supply of this essential nutrient by using **Spectra-Scorb Plus** regularly.

The bars in the graph represent actual data taken from Melethil et al, "Megadose of Vitamin C", published in the Annals of the New York Academy of Sciences, vol. 498 (1987) 591-493. The lines represent hypothetical values. Real values will vary between individuals depending on their digestive system.

Spectra-Scorb Plus

Spectra Scorb Plus contains the following per tablet:

Vitamin C	1000 mg
Calcium (ascorbate)	60 mg
Magnesium (ascorbate)	24 mg
Zinc (ascorbate)	2.5 mg
Potassium (citrate-aspartate)	30 mg
Manganese (ascorbate)	125 mcg

Molybdenum (ascorbate) 50 mcg
In a base containing: Hesperedin, Rose Hips, Acerola Cherry, Pectin, Orange, Lemon, Grapefruit and Rutin.

Available in bottles of 120 tablets.

Other Daily Products

Daily Manufacturing is a basic manufacturer of a wide range of vitamin, mineral, herbal, and other nutritional supplements. **Daily manufacturing** is primarily in the business of making **Daily** brand products, but also manufacturers products for other companies who want **Daily** quality products in their name. **Daily Manufacturing, Inc** is a leader in the manufacture of innovative new products using MSM, colloidal silver, and beta glucan as well as more traditional nutrients.

Daily Manufacturing, Inc. Your Partners In Health

Daily Manufacturing is a small family owned business with the sophistication of larger companies. All of our people, whether sales representative, research scientist, quality control engineer or manufacturing technician, are committed to joining you in the quest for optimal health. When you use **Daily** supplements you do not just buy a vitamin or mineral. You hire a team of nutrition experts to become your partners in health.

When you use Daily Supplements..., you hire a team of nutrition experts to become your partners in health!
